TriVIN, Inc. ANNOUNCES THE RELEASE OF ITS ONLINE REGISTRATION SYSTEM (OLRS) IN INDIANA

Indiana BMV approves triVIN Online Registration and Titling System

Groton, Connecticut – August 18, 2008 -- TriVIN, Inc., the leader in online vehicle registration and titling products, announced today the release of its Online Registration System (OLRS) in Indiana. With the triVIN OLRs, Indiana automobile dealers now have a software-based solution that improves the efficiency and convenience of all aspects of motor vehicle credential processing and administration, by allowing them to register and title vehicles online. Dealerships throughout Indiana can now use the system to offer quick and accurate registration and titling service to their customers.

TriVIN has worked with the Indiana Bureau of Motor Vehicles (BMV) over the past year to incorporate the OLRs into the State's existing registration and titling process. "The triVIN team was impressed with the Indiana BMV staff's organization and professionalism in bringing our product to market," said Mark Furcolo, President of triVIN, Inc.

With the triVIN system, dealers enter information through the OLRs software. That information is sent in real time to Indiana's BMV database and updates the associated vehicle records. These direct, accurate and immediate data transmissions to the State benefit all parties involved, from the dealership to the customer, from law enforcement to the BMV.

TriVIN, Inc. has over 15 years of experience in the registration and titling industry. The release of the Indiana product expands triVIN's national footprint to 11 states. The Indiana OLRs was developed on triVIN's ERTWorks™ platform which is Windows-based, Internet-ready, and compatible with most Dealer Management Systems (DMS).

About triVIN, Inc.

TriVIN, Inc. is headquartered in Groton, CT, and has fully-staffed remote offices in Wake Forest, NC; Albany, NY; and Sacramento, CA.

TriVIN designs state-of-the-art automated tools that improve the accuracy and efficiency of motor vehicle processing and lien and title management. TriVIN is committed, through partnerships with motor vehicle jurisdictions, to making motor vehicle credentialing and electronic lien and title administration more accessible, more convenient, and easier for companies and citizens alike.

TriVIN employs more than 600 people who provide its customers with expertise in the fields of direct sales; marketing; software application development, installation, training and support; customer service; and accounting. TriVIN personnel are highly trained, knowledgeable, courteous professionals who provide expert, thorough, and timely results.
