

Providing a full suite of title and registration solutions.

Greetings,

Thank you for your interest in triVIN. I am confident you will find products and services in our robust portfolio to meet your motor vehicle registration, titling, and lien management needs.

We at triVIN are dedicated professionals who have a passion for improving the efficiency of automobile credentialing and collateral management nationwide. We introduced our first Electronic Titling application in 1991 and our first Online Registration System (OLRS) in 1993 and have continued to improve upon them and introduce new technologies ever since.

With products and services tailored to meet state government mandates and your unique business requirements, we pave the way to streamlined motor vehicle processing and stress-free administration. Our customer service is world class, and we look forward to working with you.

Please take a look at what we have to offer and let us know how we can help you.

Mark A. Furcolo
President and Chief Executive Officer

At triVIN, we believe the automotive industry is best served by a company who understands all aspects of motor vehicle processing – from loan to license plates. As a result, we offer a comprehensive package of solutions geared toward streamlining these processes and lightening your load.

Online, real-time motor vehicle processing from your office PC.

The Online Registration System (OLRS) is the automated answer to the burdensome manual process of registering and titling vehicles. By bringing motor vehicle departments and their business counterparts online, triVIN has successfully made motor vehicle processing faster, easier, and more accurate.

Out-of-state motor vehicle work processed for you.

Because rules and regulations vary by state, triVIN recognizes the difficulty in sorting through and processing paperwork for cross-border deals. In response to this dilemma, we formed RegUSA, the division of triVIN that processes deals for all 50 states. With both electronic and manual submission options, RegUSA offers the fastest turnaround and most accurate processing for deals originating anywhere in the country.

Since the need to automate manual processes also extends to the financial institutions that support vehicle sales, we partnered with FDI to round out our portfolio of automotive industry offerings. In addition to paperless title processing, FDI also provides complete title outsourcing with in-house storage and management. Both options relieve lending institutions of the physical storage demands and security risks associated with handling titles themselves.

Lien and title management for the life of the lien or loan.

The OLRs puts you in control.

By automating motor vehicle transactions you normally take or mail to the motor vehicle department, the OLRs allows you to do motor vehicle work when it's convenient for you.* Using the OLRs means:

- **no more waiting in line** - process online and in real time from your Windows PC+
- **less paperwork** - submit deals electronically instead of walking or mailing them in
- **increased accuracy** - get exact fees directly from the motor vehicle department

And the DMS Import feature provides even more time-savings and accuracy because it eliminates the need to do a lot of retyping. By importing deal info right from your DMS, it reduces the chances of making typo-related mistakes.

There's no question. The OLRs saves you time and money - and makes your job easier, too!

*Actual hours of processing are set by state motor vehicle departments and may vary.
+Minimum system specifications are required. Please contact us for details.

Online, real-time motor vehicle processing from your office PC

The OLRs is very user-friendly and an invaluable asset to our business. It is a major time-saver - I've only had to drive to the DMV twice in the past year!

~ Karen Hartrich, Title Clerk, American Harley-Davidson, NY

Our sales continue to expand all over the U.S. As part of our overall commitment to customer service, we are now able to offer full-service titling and registration services to all our customers.

~ Deborah Norris, Foreign Cars International, NC

Get it off your desk - put it in our hands.

TriVIN developed RegUSA in response to dealer requests for a way to do cross-border motor vehicle work. With a team trained specifically on each state's particular set of rules and regulations, RegUSA provides processes motor vehicle work for all 50 states. Our superior customer support and ability to see transactions through from start to finish produce the fastest turnaround and most accurate results available.

While we accept motor vehicle work through postal mail, we encourage customers to utilize our online tool, eRegUSA, to submit their deals electronically. Doing so expedites all transfers of information, which means you get your completed work faster. Enrollment in eRegUSA is free and gives members easy, on-demand access to:

- **lists of required documents for each state**
- **motor vehicle fees and sales taxes for each state~**
- **automatic population of available state forms~**
- **email updates each time a deal's status changes**
- **electronic tracking of deal status**

Whether you choose to mail them or submit them electronically, RegUSA processes deals for all 50 states so you don't have to.

~These services are free if the corresponding deal is submitted to RegUSA within 25 days of the initial inquiry; otherwise, they are available by subscription. Please call 800.211.3638 for more information.
